

Ryan Spears

Website Developer

PROFILE

I have a passion for design and problem solving. I have been programming for 4 years now as a hobby and I decided to make it into a career. I have always loved to create websites and play around with the code. In the future I hope to leave an impact on the world with the websites and code I have created.

WORK EXPERIENCE

Chief Vapor

Web Master/Python Developer

- Created and operated integration software for database management.
- Created multiple efficiencies on manual processes using Python and APIs creating immediate savings.
- Automated inventory bumps between 4 locations taking away the need for manual transfers.
- Worked with REST APIs to interact with online stores automating inventory stocking and fulfillment by location
- Transferred website to WordPress adding custom CSS styling and new functionality.

Best Catch Fishing Charters

Lead Frontend Designer

- Designed and developed user friendly interfaces to ensure a smooth experience for potential customers
- Provided technical integration with payment methods on the site
- Collaborated with the client to ensure requests and expectations were met throughout the design process

PROJECTS

Projects can be found on my online portfolio

IP Address Tracker

- ▶ Mini web application that displays information of a IP address and pins the locations on a map.

Crowd Source Site

- ▶ A simple landing page for a crowd funding projects
