PROFESSIONAL PROFILE

I have a passion for design and problem solving. I have been programming for 4 years now as a hobby and I decided to make it into a career. I have always loved to create websites and play around with the code. In the future I hope to leave an impact on the world with the websites I make and code I have created.

EXPERIENCE

WEBMASTER & PYTHON DEVELOPER
Chief Vapor, Colorado | January 2020 – Present

Chief Vapor is a branch of small retail stores that sell vaporizer related products. In short, my responsibilities at Chief Vapor deal with managing the websites and inventory data.
- Using Node.js and Python, I integrated automatic inventory transfers and inventory updates, saving management about 5 hours each week.
- Improved website's SEO by using specific keywords causing the online traffic to increase by around 25% daily.
- Made a redirection site for an older domain to save potential customers who have not found the new domain name, which increased traffic by 5%.
- Used CSS on their WordPress site to add owner's custom styling preferences to the user interface.

FRONTEND DEVELOPER
Best Catch Fishing, Tampa, FL | October 2020 – December 2020

Best Catch Fishing is a fish charter business located around the Sarasota area in Florida. My job here was contract based where I designed, developed, and maintained their website
- Created a polished landing page that attracted new clients to the business and website.
- Integrated online booking to increase the number of sales for Best Catch by making it an easier experience to book a charter.
- Designed, developed, maintain, and test the landing page with Google Analytics to improve conversions.

PROJECTS

COUNTRY SEARCH APP
View Project
A simple web app made with React that consumes an API to search for countries. You can also filter the country search by region.

TRIVIA APP
View Project
A React app that uses a question API to create a trivia game for the user. The user has the option for a hint and the goal of the app is to get as many questions as possible right before your lives run out.
